Implant Certificate course

Introduction:

- A course designed to help all dental graduates enter the world of Implantology.
- The course caters to the special needs of dentists towards learning with an emphasis on adopting an evidence-based approach for all aspects of this science- that too at the very beginning of their career in Implantology.
- This innovative learning model combines ON-SITE learning via lectures, hands on, live demo sessions.

Learning objective: The participants will be able to

- Understand principles of prosthetically driven Implantology.
- Perform all the prosthetic steps in Implantology confidently.

Course duration: 2 days

Tentative date: January 2025

Target Audience: Dental graduates willing to start their implant practice

Modules: Total 16 Hrs

Module 1 Lectures:

- Impression techniques, soft tissue management, occlusion, maintenance protocol. Abutment selection and applications. Restorative materials

and clinical applications. Prosthetic complications and their management.

Module 2:

- Live clinical demonstration.
- Hands on: Participants to make impression on models (open tray/ closed tray), jig trials.
